EDUCATION

University of Texas at El Paso

Bachelor of Science in Computer Science

El Paso, TX

Aug. 2019 – May 2022

El Paso Community College

Associate of Arts in Multidisciplinary Studies

El Paso, TX

Aug. 2015 – June 2019

EXPERIENCE

Software Developer (Capstone Project)

University of Texas at El Paso

August 2021 – June 2022

El Paso, TX

- Developed a scalable and secure data management service project for Defense Communications (DEVCOM), a leading organization in the defense industry using HTML, node.js, and MongoDB.
- Ensured data integrity in the service by debugging and resolving issues.
- Defined necessary data management pipelines and requirements by continually collaborating with company stakeholders.

Full-Stack Software Engineer

Geedop, Inc.

Aug. 2024 – Present

El Paso, TX

- Develop and maintain an iOS utility app using Swift and Objective-C, enabling seamless embedded device configuration via Wi-Fi.
- Implement API integrations and JSON data handling to facilitate communication between the app devices.
- Enable communication with an AWS Cloud for data storage, file transfer, and online operations.
- Engineer embedded software using PlatformIO and C/C++ for microcontroller platforms, enabling robust hardware interaction, real-time DMX signal processing, and remote configuration through an iOS frontend.
- Optimize app performance and UI responsiveness through best practices in Swift and Objective-C development.
- Ensure complete application workflow functionality with thorough formatting troubleshooting.
- Create technical documentation using diagram and text formatting tools to support team members and future development.
- Collaborate cross-functionally with hardware and AI teams to ensure seamless software integration.
- Maintain version control and continued development using Git.

PROJECTS

Music Overlay App | *Java, Maven, Spotify API, Git, Servlet, JNA Platform, Javadoc*

June 2023 – Present

- Created a desktop application using Java that leverages the Spotify API for an enhanced entertainment experience.
- Implemented OAuth to securely retrieve data from the servers for the user's profile.
- Created an informative GitHub page for the application along with a custom logo.
- Generated full, extensive documentation of the application using Javadoc.

Portfolio Website | *HTML, CSS, JavaScript, FireBase*

January 2023 – Present

- Developed a user-friendly portfolio website to demonstrate my experience, projects, and poetry.
- Optimized for reliability, performance, and usability by using FireBase hosting for website deployment.
- Integrated functionality using JavaScript to create interactive elements such as animations and smooth transitions, enhancing user experience.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript, HTML/CSS, Swift, Objective-C, C++, Markdown

Frameworks: React, Node.js, Spring, Amplify, SwiftUI, UIKit, GStreamer

Developer Tools: Git, Maven, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Javadoc, XCode, PlatformIO, Arduino IDE, Package Managers

Libraries: NumPy, Matplotlib, pandas, Servlet, Kingfisher

Languages: English fluent, Spanish fluent, Elementary Japanese
